- Hibernate
- Apache Kafka
- JPA
- Swagger
- PL/SQL
- Python
- Git
- Shell
- Linux
- JavaScript
- AngularJS
- ReactJS
- ExtJS
- HTML5
- CSS3
- SCSS

## Languages

- French - Fluent
- English - B1
- Ukrainian - C2

## Hobbies

- Bitcoin
- Blockchain
- Cryptocurrency
- Traveling
- Cycling
- Mountains

## Profile

I am a freelance developer with five years of professional experience. I am mainly experienced in back-end development (Java/Spring, SQL, PL/SQL, Apache Kafka) and can do front-end with React, Angular, or ExtJS. I am looking for challenging assignments in an exciting industry to implement my Java skills and improve my JavaScript skills.

## Experiences

### JAVA/SQL Developer

SAP Concur - Since January 2022

- Java development on a web application for travel management and allowances
- PL/SQL functions, procedures and scripts to update data in an Oracle database
- Ext JS and SCSS development for front-end rework

### Back-end developer

DoubleTrade - July 2019 to January 2022

- Java 11, microservices architecture, Apache Kafka, Spring Cloud, Docker, continuous integration with GitLab CI
- Scrum, code review/pair-programming, Pull/Merge requests
- Development of new APIs for a SaaS business intelligence application on public markets in France

### Full Stack Developer

Wemoov - April 2019 to June 2019

- Development of a back-office and APIs for video editing with FFmpeg using JHipster with Java, AngularJS, SQL, Jenkins and Git

### Web Developer

Department of Justice - January 2018 to August 2018

- Redesign of internal applications for collecting data from the administrations to produce statistics: Java, Angular, Docker, SQL, Git and SVN
